

Comprehensive power quality and energy studies

Get the data you need to make critical decisions in real-time with the new Fluke 1736 and 1738 Power Loggers.

More visibility.

Automatically capture and log over 500 power quality parameters so you have the data you need, when you need it, helping you to optimize system reliability and savings.

Reduced uncertainty.

Simplify setup by powering the logger directly from the measured line and reduce measurement errors with an intelligent verification function that digitally corrects common connection issues.

Better decisions.

Access and share data remotely via the Fluke Connect® app so you can maintain safer working distances and make critical decisions in real-time, reducing the need for protective equipment, site visits and check-ins. Quickly and easily chart and graph measurements to help identify issues and create detailed reports with Fluke Energy Analyze Plus software.
