

1EV1905X Probe Kit (1905A & 1023)

The 1905X Probe Kit allows the 1905A SMD Probe Leads to be used with Wayne Kerr analyzer models which do not have a 2-terminal setting for their front panel BNC connectors. This is achieved by using the 1023 4 into 2 BNC Adaptor. This kit is required when using 6500 or 4300 analyzers.

Suitable models

6500B Precision Impedance Analyzer

6500P HF LCR Meter

4300 LCR Meter

Specification

Frequency: 20 Hz to 100 kHz

Connection to Analyzer: 1023 4 into 2 BNC Adaptor

Connection to DUT: 2 spring-loaded needle point probes
