Wohler Viper System

The Wohler Viper System is a uniquely designed line of various sized rods for professional use when sweeping chimneys, ventilation systems, duct work or stoves. The viper rods are made of a central fiberglass core with plastic, protective cover. The rods are available in different lengths and strengths to provide you with the right combination of flexibility and length to cover a broad variety of cleaning applications.

From our thickest 4.3" XL viper to our most flexible 1.7" mini viper and the Wohler H 420 handy viper with its digital distance measurement, there is a wide selection of threaded or star brushes that you can use for the respective cleaning. The continuous rod design housed in either a free standing or hand held rotating basket provides easy operation that saves you time, effort and money.
