

# Weighing Data Logger AD-1688

## Save, Carry, and Retrieve

*The AD-1688 weighing data logger is a handheld device that lets you collect weighing data without connecting the balance or scale to a PC!*

### Dual Interface

An RS-232C interface to import weighing data from an A&D balance or scale and a USB interface to export the data to a PC (no driver software is required)

### Large Memory

Approx. 5,000 weighing data sets (in the A&D standard format) can be stored

### Internal Clock

The date and time the data is saved is stored in data

### Highly Portable

Small size and IP65 dust and waterproof (with the casing cover)

### No Battery Required

Receives power supply directly from a balance, scale or PC

(Actual size)

The AD-1688 is especially useful when a PC or printer cannot be placed near the balance or when you need to collect data from multiple balances at different locations (such as in a factory)
