

COMPONENTS FOR CONNECTING

Fiber Optic Stripper

AF-003

It removes coating of 230 and 900 μ m

Ergonomic design

The precision stripping blades are manufactured meeting the highest quality standards to ensure a clean and precise cutting. The tool design is ergonomic and covered with rubber for a more comfortable and safety use. It removes the 3mm cover of the optical fiber and the coating of 250 μ m and 900 μ m.

*The fiber optic stripper is available as accessory or as a part of the **Connecting Kit PL-10**, which includes in a suitcase all the most important tools and equipment to make inexpensive fiber connections. It is also available as a part of the **Fusion Kit PROLITE-40**, which includes a splicer and a fiber optic stripper.*
