## **ASTM** Weight Sets

ASTM weight sets include a complete group of test weights that can meet requirements for testing to ASTM standards. Class 0 weights are designed for metrology laboratories. Class 1 and 2 weight sets provide a high level of accuracy and are ideal for calibrating analytical and precision balances. Class 4 weight sets offer a lower level of accuracy, but are affordable and ideal for calibrating compact portable balances and bench scales.

Stainless steel weight sets for calibration that meets testing requirements and standards

## **Features**

Cotton Glove

- \* Stainless steel weights for durability and accuracy
- Aluminium case to safely store weights
