

Moisture Meter for Cotton

C-2000

The C-2000 effectively measures moisture content in cotton fibers to ensure high-quality cotton during the ginning process. Its digital display, adjustable alarm alerts, and four separate scales for lint cotton, seed cotton, viscose rayon, and wool allow for versatility and convenience when buying and selling cotton.

Electrodes and Accessories

30-E/C

Used for bales. 9 1/2" insulated pins with 8 1/4" penetration. Eliminates effect of surface moisture.

37-E/C

Used for yarn. 1 1/2" pins with 1" penetration.

MCS-Cotton

6% and 12% electrical resistance values allow for accurate readings and calibration.

52-E/C

Cup type electrode used for lint or seed cotton.

830-T/C

Heavy duty steel 36" T-handle used for modules.

For over 65 years, Delmhorst has been the leading manufacturer of high quality moisture meters and thermo-hygrometers. We offer a wide range of meters for a variety of applications, including restoration, IAQ, flooring, woodworking/lumber, construction, agriculture, and paper.
