

# DIRIS Digiware IO

Digital and analog input/output modules

Multi-circuit metering  
and measurement

**DIRIS Digiware IO-10**  
4 digital inputs/2 digital outputs

**DIRIS Digiware IO-20**  
2 analog inputs

Configuration  
with EasyConfig,  
see page 280.

## Function

DIRIS Digiware IO modules enrich the measurement system with multiple features:

- DIRIS Digiware IO-10 modules have 4 digital inputs and 2 digital outputs.

The 4 digital inputs can be used to monitor the status of protection devices and withdrawable drawers (ON/OFF, trip counter) or to collect pulses from multi-fluid meters. The 2 digital outputs allow the remote control of switching devices by sending a binary output signal. Alarms can be configured and assigned to the digital outputs.

- Thanks to their 2 analog inputs, DIRIS Digiware IO-20 modules can collect the data from analog sensors (pressure, humidity, temperature...).

All the information reported by the IO-10 and IO-20 modules can be viewed on DIRIS Digiware D-xx displays and on Webview, the web server embedded in DIRIS G gateways and in the DIRIS D-70 display unit.

## Advantages

### Plug & Play

The IO modules can be easily added anywhere within the measurement system thanks to a quick RJ45 connection.

### Multifunction

The combination of voltage measuring modules, current measuring modules, and input/output modules makes DIRIS Digiware a complete and versatile system.

### Connected

All the reported information is accessible from the displays, from Webview or any other centralized management software.

### Compact

The modular format allows the quick connection of a large number of IO-10 and IO-20 modules.

### The solution for

- Industry
- Building
- Data center

### Strong points

- Plug & Play
- Multifunction
- Connected
- Compact

### Compliance with standards

- UL 61010  
guide FTRZ  
file E257746

- IEC 61557-12

- ISO 14025

## Application diagram

Digital inputs/outputs

Digiware Bus

**DIRIS Digiware IO-20**

Analog inputs

## Technical characteristics

### Measuring characteristics

**Digital inputs/outputs- DIRIS Digiware IO-10**

Number of inputs	4
Type/power supply	Insulated input, internal polarisation 12 VDC max., 3 mA
Input function	- Logical status - Status of the circuit breaker, of the drawer (ON/OFF, trip counter) - Pulse counter
Number of outputs	2
Type	Insulated output, 48 VDC max., 50 mA and 24 VAC max.
Output function	- Remote control of status - Alarm signal linked to the inputs (exceeding threshold, status...)
Input/output connection	Removable screw terminal block, 9 positions (5 dedicated to inputs, 4 dedicated to outputs) Stranded or solid 0.14 to 1.5 mm <sup>2</sup> cable

**Analog inputs - DIRIS Digiware IO-20**

Number of inputs	2
Type/power supply	0/4-20 mA, 200 Ω max
Accuracy	0.5% full scale
Function	Connection of analog sensors (pressure, humidity, temperature...) with choice of interpolation (linear or quadratic)
Input connection	Removable screw terminal block 2x2 positions, AWG15 to AWG35 or 0.14 to 1.5 mm <sup>2</sup> stranded or solid cable
