ENHANCED SMART

ESM™ Series Digital Multimeters

Combining function and safety for the most demanding electrical testing applications.

When it comes to electrical test and measurement, Greenlee provides the tools that get the job done! We have taken our already successful line of digital multimeters and combined them with the latest advances in microchip technology, to create the new ESM™ Series of digital multimeters for professional electricians.

You'll find that we focused heavily on increased user safety, product functionality and an enhanced user interface in response to what our customers demand in a digital multimeter – whether it's our entry-level 6000 count DM-200A, or our top-of-the-line DML-430A dual-display logging meter.

Key features found on our entire series include BEEP-JACK™ technology that guards against improper test lead plug-in, and a bright backlight for operating in dark spaces. All meters have PC interface capabilities for recording project readings when needed. Upgraded functions on specific models include True RMS, single or dual-channel temperature measurement, non-contact and single-probe voltage detection, data-logging and AutoCHECK™ mode. AutoCHECK™ automatically selects AC volts, DC volts or resistance and features low input impedance to eliminate “ghost voltage” pickups.

Greenlee's new ESM™ Series of digital multimeters, ranging from CAT IV 300V to CAT IV 1000V, can ensure the necessary task of accurate electrical test and measurement. And as part of our test and measurement product line, the Greenlee ESM™ Series are UL listed, meet the latest industry safety standards and are backed by a lifetime limited warranty.

DM-510A

RTI METER™ SERIES

GREENLEE®

A Textron Company

Dual Digital Display

Simultaneously View Relevant Parameters in Complementary Display

Auto & Manual-Ranging

Auto-Ranging with Manual Ranging Override

EF-Detection

Both Non-Contact (NCV) & Single-Probe Voltage Detection for Identifying Live Lines (DM-820A and DM-830A)

PC Interface Capability

Optional USB Cable with Data Recording PC Software for WIN98/NT4/XP/VISTA

AutoCHECK™ Feature

Automatic Selection of AC Volts, DC Volts or Resistance with Low Impedance for Ghost-Voltage Elimination (DML-430A and DM-830A)

BEEP-JACK™ Audible & Visible Warning

Guards Against Improper A- and mA-terminal Plug In to Decrease Risk of Damage

800A Series and Data-Logging Multimeter

DML-430A

DM-830A

The most robust hand-held devices on the market for CAT IV 1000V.

The DML-430A, our top-of-the-line dual-display logging meter, heads up Greenlee's 800A Series multimeters. However, each is packed with functions you can rely on to get the job done, such as AutoCHECK™, NCV EF-Detection, Ghost-Voltage Elimination, audible and visible alerts and a high-resolution display. With standard features like these, you can be sure there is a Greenlee multimeter that meets the needs of any job. Use the chart below to select the model that meets the needs of your jobs.

Each multimeter in the 800A Series includes a durable carrying case for meter storage and protection. If tracking, organizing and storing jobsite data measurements is critical, then complete your purchase with our PC interface software.

DM-210A

DM-510A

Critical functions in a streamlined design for CAT IV 300V, CAT III 600V and more...

The 200A and 500A Series were designed to provide all of the critical day-to-day features of hand-held multimeters in a smaller, ergonomic design. Look to this series for CAT IV 300V, CAT III 600V and CAT II 1000V applications and take advantage of AutoCHECK™, EF-Detection, audible and visible alerts and a back-lit LCD display. Use the chart below to choose the model in this series that suits your needs the best.

Backed by Greenlee's lifetime limited warranty, the 200A and 500A Series multimeters offer the professional electrician superior value when compared to the competition. If tracking, organizing and storing jobsite data is necessary for you, then add the optional PC interface software.
