

# FAST AND ACCURATE COMBUSTION CHECKER

## Tune up the furnace.

The Combustion Checker is a great tool to easily tune furnaces when a full combustion analysis isn't necessary. Designed specifically for HVACR pros, the combustion checker provides all the essential measurements needed to tune most combustion equipment. It directly measures %O<sub>2</sub> and flue temperature, and calculates %CO<sub>2</sub>, %Excess Air, and combustion efficiency.

## Combustion Checker, SOX3

- Measures flue temp and %O<sub>2</sub>
- Calculates %CO<sub>2</sub>, %EA, and combustion - efficiency
- Programmable for custom fuel types
- Hands-free testing with magnet, R-cone, and automatic pump
