

Micro-Lite[®]

MICROSCOPE ILLUMINATION

Flicker-Free Fluorescent

Patented Ballast Technology Can Even Be Used with Cameras – No Rolling Image!

FL1000

Micro-Lite[®] High/Low Ring Illuminator (FL1000)

Micro-Lite[®] High/Low Fluorescent Ring Illuminator is the highest quality fluorescent ring on the market. The exclusive 'flicker-free' design makes for fatigue free usage. Our specialized ballast technology eliminates flickering that can cause eye fatigue, and allows for more lumen output per watt. This is in a class all its own. 60mm ID (66mm available), with a whole host of adapters available. **ESD SAFE**

Micro-Lite[®] Fully Variable Ring Illuminator (FV1000)

Micro-Lite[®] Fully Variable Fluorescent Ring Illuminator offers exclusive dimming control, as well as flicker-free performance. Dimming range from 100 – 20%. The same ballast technology as our FL1000, zero flicker and highest lumen output per watt in the industry, this illuminator can work with almost any microscope on the market today. 60mm ID (66mm available). **ESD SAFE**
