The World's Sixth Sense™

FLIR Moisture Kits give you a complete solution, providing all the tools you need to troubleshoot moisture in one package while saving you money! Each moisture kit combines an IGM™ (Infrared Guided Measurement) thermal imaging moisture meter with FLIR probe accessories for precision measurements. Our premium imaging moisture meters with IGM visually guide you to the precise spot that needs further testing and investigation, and our high-quality, durable accessories allow you to probe into hard woods, dense materials, sub-flooring, and even deep wall cavities, simplifying your job and making your life easier.
