

62-200 Linkmaster™ RJ-45 Cable Tester

Basic wiremapper for identifying wiring and continuity errors in twisted pair cabling. Colored LED lights identify pass/fail conditions of each pair of wires in RJ-45 8 conductor cables.

- LED based wiremapper verifies cable continuity on RJ-45 cables
- Identifies errors by pair: shorts, opens, miswires, reversals, and split pairs
- Easy 1 button operation
- Debug feature cycles through errors pair by pair
- For 8 conductor 4-pair, twisted pair cables
- Designed for CAT3/5/5e/6/6a cables.
- RJ-45 port interfaces
- Identifies shield continuity
- Includes 4 x 1.5v LR44 batteries in main unit.
