

Extension Moisture Probe - BLD5035

Applications

Locate missing or wet insulation in a wall cavity or crawl space.

Features

- Durable probe coating
- Insulated probes measure moisture only at the tip, allowing the user to obtain readings at certain depths.
- Probe tips are pointed and do not require drilling holes into drywall.
- Two probe sizes are included at 3-inch and 6-inch lengths.
- Threaded base allows for use of an extension handle.
- For use with any Protimeter pin-type moisture meter, including Surveymaster, Mini, Mini C, Timbermaster and MMS meters.
 - Spare pins - 3" pack of 2 BLD05298, 6" pack of 2 BLD05299

Baseboard Moisture Probe - BLD5025

Applications

- Measure moisture behind baseboard moldings without having to remove them.
- Measure moisture in sill plates by sliding over carpet and under baseboards.

Features

- Durable probe coating
- Insulated probes measure moisture only at the tip, allowing the user to obtain readings at certain depths.
- Threaded base allows for use of an extension handle.
- For use with any Protimeter pin-type moisture meter, including Surveymaster, Mini, Mini C, Timbermaster and MMS meters.
