

Datasheet

MSO/UPO2000 Series Digital Oscilloscope

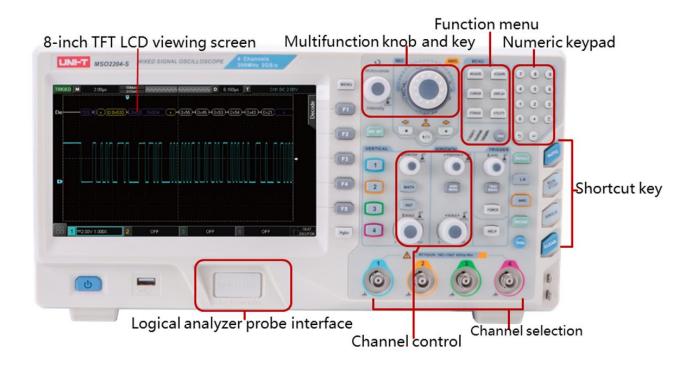

V1.2

August 2024

Main Features

- Analog channel bandwidth: 200 MHz, 100 MHz
- Real-time sampling rate of analog channel: 2 GSa/s, Real-time sampling rate of digital channel 1 GSa/s (only MSO)
- Number of analog channels: 2 or 4
- Memory depth of each channel: 56 Mpts
- 16 digital channels, storage depth 56 Mpts (only MSO)
- Waveform capture rate up to 1,000,000 wfms/s
- Built in 50MHz dual channel function / arbitrary waveform generator (only MSO-S). It supports real-time loading of oscilloscope screen data to AWG arbitrary wave output
- Support Bode Plot loop test and analysis function
- Hardware real-time waveform uninterrupted recording and analysis up to 120,000 frames
- Waveform operation functions (+, -, ×, ÷, digital filtering, logic operation and advanced operation)
- 4M points enhanced FFT, supporting frequency setting, waterfall diagram, detection setting and mark measurement, etc
- Auto measurement of 36 waveform parameters
- Supports parameter measurement while scanning
- Multi-Scopes supports multi-channel independent trigger and fluorescent display
- Multi-channel independent 7-bit hardware frequency counter
- DVM supports multi-channel independent AC / DC true RMS measurement
- Rich trigger functions: edge, pulse, video, slope, runt, over amplitude pulse, delay, timeout, duration, setup/hold, Nth edge and pattern trigger
- Zone trigger function, which can be used to capture accidental signals and observe complex signals
- Protocol trigger and decoding function (optional): RS232, I2C, SPI, CAN, CAN-FD, LIN, FlexRay
- Ultra Phosphor super fluorescent display effect, up to 256 levels of gray display
- 8-inch 800×480 capacitive touch, supporting various gesture operations: click, slide, zoom, edit, drag, etc
- Rich interfaces: USB Host, USB Device, LAN, EXT Trig, AUX Out (Trig Out, Pass/Fail), AWG, VGA
- Supports SCPI programmable instrument standard commands
- Supports web access and control

Panel Structure

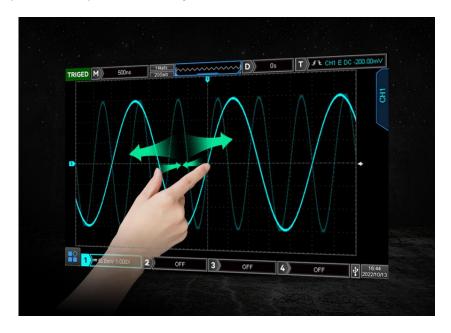

Product Introduction

The MSO/UPO2000 series digital phosphor oscilloscope is a multifunctional and high-performance oscilloscope based on UNI-T's original Ultra Phosphor technology. It realizes the combination of ease of use, excellent technical indicators and many functional features. It can help users complete the measurement work faster. It is an oscilloscope designed for general design / debugging / testing needs in many fields, such as communication, semiconductor, computer, instrumentation, industrial electronics, consumer electronics, automotive electronics, on-site maintenance, R & D / education, etc. Fast Acquire technology can accurately capture abnormal events such as video, jitter, noise and low wave signals.

Brand new interactive experience

The 8-inch touch screen design supports a variety of gesture operations, such as click, slide, zoom, edit, drag, etc. Makes measurement actions smoother and more convenient, allowing users to master the oscilloscope more quickly. At the same time, the traditional button and knob operation is still retained, and the interactive experience is optimized to the greatest extent.

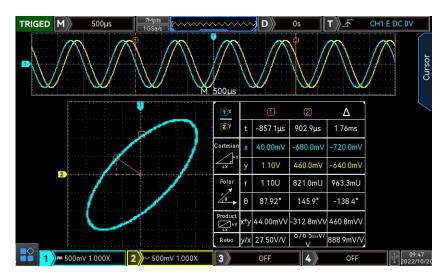

Rich measurement functions

Automatic parameter measurement up to 36 kinds. Provides a variety of automatic measurement parameters while you measure waveforms, greatly improving your measurement efficiency.

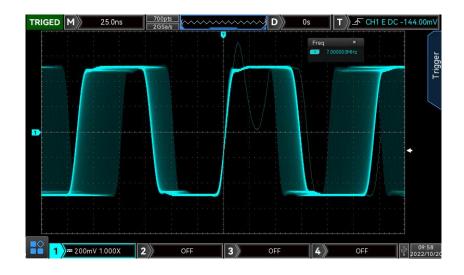

XY mode

XY mode cursor measurement can quickly measure the phase difference between two signals.

Ultra high capture rate

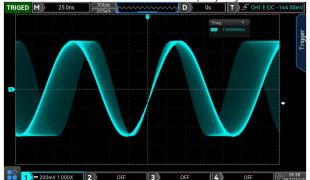

Using innovative digital signal parallel processing technology, it can reach an ultra-high capture rate of 200,000wfms/s in normal sampling and 1,000,000 wfms/s in Fast Acquire mode. Efficient capture of occasional signals.

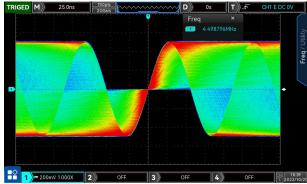

256-level grayscale display

Using the original Ultra Phosphor display technology, you can observe the accumulated effect for a long

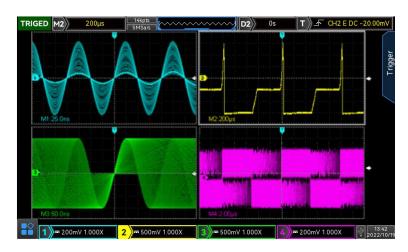

time, which is convenient for displaying waveform details and occasional abnormalities.

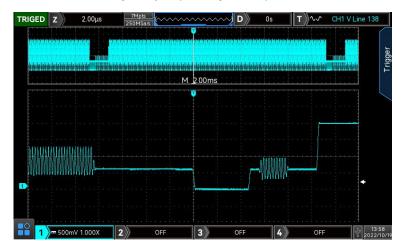

Channel split screen function

Using the original Multi-Scopes technology, the waveform display is more user-friendly, which is convenient for users to experience and analyze waveform details.

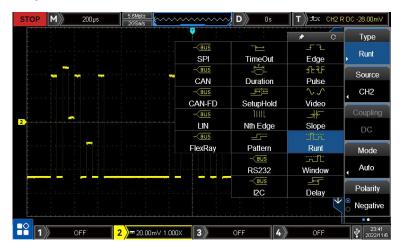

Memory depth 56Mpts per channel

The oscilloscope can maintain a high sampling rate in a wider time base range, while taking into account the overall and details of the waveform, greatly improving the capture rate of abnormal waveforms.

Rich trigger function

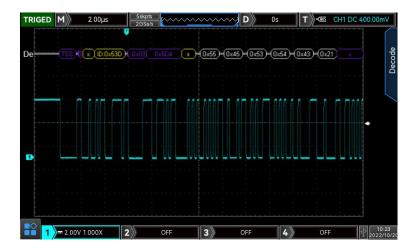

With a wealth of advanced trigger and bus trigger functions, it can help users accurately and quickly capture and display the signal of interest.

Full memory hardware decoding

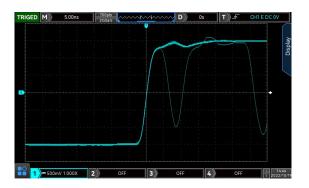

The decoding speed is greatly improved. The full-memory hardware decoding under the deep storage of 56Mpts, the decoding time is increased from more than ten seconds to milliseconds, which realizes real-time decoding and greatly improves the user's problem diagnosis efficiency.

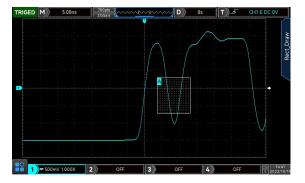

The recorded waveform also supports full-memory hardware real-time decoding.

Zone trigger

The zone trigger can be used in combination with the existing basic trigger, advanced trigger and protocol trigger to complete the capture of various occasional and complex characteristic signals.

AWG Function Arbitrary Waveform Generator

The built-in dual-channel function arbitrary waveform generator can output sine wave, square wave, ramp wave, pulse wave, arbitrary wave, noise and DC. The maximum frequency output of sine wave is 50MHz.

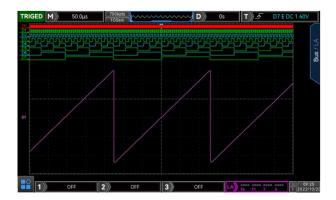

Bode plot

Can be used for loop analysis. It is a critical measurement often used to characterize the frequency response (gain, phase, and frequency) of today's various electronic designs, including passive filters, amplifier circuits, and negative feedback networks for switch-mode power supplies.

LA Logic Analyzer

Can be used for parallel bus, protocol decoding and timing measurements.

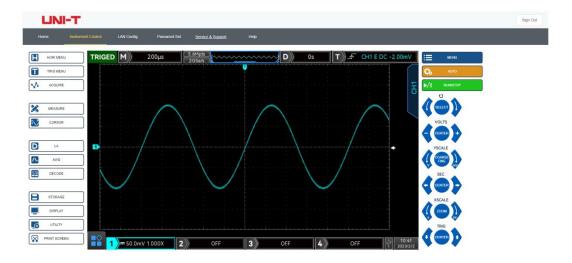

Logic Analysis Probe

Provides two 8-channel splitters and simplifies connection to the device under test. When connecting with square pins, UT-M15 can be directly connected with 8X2 square pin headers with pins of 2.54mm. The UT-M15 offers excellent electrical characteristics with an input impedance of $101k\Omega$ and a capacitive load of only 9.0pF.

Web Control

The oscilloscope can be accessed through the web page, saving the trouble of installing the upper computer software. Support PC and mobile phone dual platform control. Remote operation is more flexible and comfortable.

Performance Characteristics

All specifications are warranted except those marked "Typical".

Unless otherwise stated, all specifications are for probes with the attenuation switch set to $10 \times$ and the MSO/UP02000 series digital phosphor oscilloscope. To meet these specifications, an oscilloscope must first meet the following two conditions:

The instrument must run continuously for more than 30 minutes at the specified operating temperature. If the operating temperature variation range reaches or exceeds 5 degrees Celsius, you must open the system function menu and execute the self-calibration function.

| Model | UP02102 UP02104 MS02102 MS02104 MS02102-S MS02104-S | UP02202 UP02204 MS02202 MS02204 MS02202-S MS02204-S | |
|------------------------------|---|--|--|
| Analog Bandwidth(-3dB) | 100 MHz | 200 MHz | |
| Rise time (Typical value) | ≤3.5 ns | ≤1.8 ns* | |
| Channela | UPO 2XX2:2 analog channel, UPO 2XX4:4 analog channel MSO2xx2:2 analog channel +16 digital channel, MSO2XX4:4 analog channel +16 digital channel | | |
| Channels | 16 digital channels (UPO2000-16LA is optional for UPO series) | | |
| | 2-channel arbitrary wave generator output (only MSO-S) | | |
| Sampling mode | real-time sampling | | |
| Acquisition Mode | Normal, peak detection, envelope, high resolution, averaging | | |
| Real-time sampling rate | Analog channel: 2 GSa/s (half channel interleaved), 1 GSa/s (all channel) Digital channel (MSO model only): 1 GSa/s; | | |

| Average | After all channels are sampled for N times at the same time, the N times can be selected from 2, 4, 8, 16, 32, 64, 128, 256, 512, 1024, 2048, 4096, and 8192 | | |
|--|--|--|--|
| Memory Depth | Analog channel: Automatic, 7 kpts, 70 kpts, 700 kpts, 7 Mpts, 28 Mpts, 56 Mpts are optional | | |
| | Digital channel (MSO model only): Automatic, 7 kpts, 70 kpts, 700 kpts, 7 Mpts, 14 Mpts, 28 Mpts, 56 Mpts are optional | | |
| Waveform capture rate | 200,000 wfms/s | | |
| | 1,000,000 wfms/s (Fast Acquire) | | |
| Hardware real-time waveform recording and playback | 120,000 frames | | |
| Screen | 8- inch 800x480 HD capacitive touch display | | |
| | | | |

 $^{^{\}ast}$ The typical rise time of 200MHz oscilloscope is 2.0ns for 1mV/div and 2mV/div.

| Vertical system (analog channel) | | | |
|---------------------------------------|--|--|--|
| Coupling | DC, AC, GND | | |
| Impedance | (1 MΩ± 2%) (16 pF± 3 pF) 50 Ω± 1.5% | | |
| Probe attenuation | Voltage probe: 0.001X, 0.01X, 0.1X, 1X, 10X, 100X, 1000X, Custom | | |
| Frobe attenuation | Current probe: 5 mV/A, 10 mV/A, 100 mV/A, 200 mV/A, Custom | | |
| Maximum input voltage | 400V Max (DC+Vpeak) | | |
| Vertical resolution | 8-bit | | |
| Vertical scale | $500\mu V/div$ to $20~V/div$ (1 M Ω | | |
| Offset range | 500μV/div to 50 mV/div: ±2 V (1 MΩ) 100 mV/div to 500 mV/div: ±20V (1 MΩ) 1 V/div to 5 V/div: ±200 V (1 MΩ) 10 V/div to 20 V/div: ±400 V (1 MΩ) With DC offset, shows vertical shift reading V | | |
| Band limit (typical) | 20 MHz | | |
| Low frequency response | (AC coupling, -3 dB); ≤5 Hz (on BNC) | | |
| DC Gain Accuracy | <5 mV: ±3%, ≥5 mV: ±2% | | |
| DC Offset Accuracy | ≤±(2%+0.1 div+2 mV) | | |
| Unit | W, A, V, and U. The default value is V | | |
| Channel-to-channel isolation(typical) | Dc to maximum bandwidth: >40 dB | | |
| (Digital channel, MSO only) | | | |
| Threshold | Adjustable threshold for 8 channels 1 group | | |
| Threshold selection | TTL (1.4 V) 5.0 V CMOS (+2.5 V), 3.3 V CMOS (+1.65 V) 2.5 V CMOS (+1.25 V), 1.8 V CMOS (+0.9 V) ECL (-1.3 V) PECL (+3.7 V) | | |

| | LVDS (+1.2 V) | |
|---|--|--|
| | 0 V Custom | |
| Threshold range | ±20.0 V, 20 mV step | |
| Threshold accuracy | ±(100 mV + 3% threshold setting) | |
| Dynamic range | ±10 V + threshold | |
| Maximum input voltage | CAT I 40 Vrms | |
| Input impedance | (101 kΩ±1%) (9 pF ± 1 pF) | |
| Minimum voltage swing | 500 mVpp | |
| Minimum detectable pulse width(typical) | 2 ns | |
| Vertical resolution | 1 bit | |
| Channel-to-channel deskew range | ±100 ns | |
| Horizontal system (ana | alog channel) | |
| Time base Scale | 100 MHz: 2 ns/div to 1000 s/div 200 MHz: 1 ns/div to 1000 s/div (Display current sampling rate and storage depth) | |
| Time base Accuracy | $\leq \pm (50 + 2 \times \text{Use fixed number of year}) \text{ ppm}$ | |
| Timebase delay time range | Pre-trigger (negative delay) : ≥1 screen width Post-trigger (positive delay) : 1 s to 10 s | |
| | Y-T, default | |
| Display format | X-Y, CH1-CH2,CH1-CH3,CH1-CH4,CH2-CH3,CH2-CH4,CH3-CH4 | |
| | Roll, Time base ≥50 ms/div. Roll mode can be automatically entered or exited by adjusting the horizontal time base knob | |
| Multi-Scopes | Number: 2/4 Support each channel independent display, and independently adjustable time base | |
| Trigger | | |
| Trigger level range | Internal: ±5 div from the center of the screen EXT: ±1.8 V EXT/5: ±9 V | |
| Trigger modes | Auto, Normal, Single | |
| Trigger holdoff range | 80 ns -10 s | |
| Trigger coupling (typical) | DC: Passes all components of the signal | |
| | AC: The direct current component that blocks the input signal | |
| | HFRJ: Attenuates the high-frequency components above 40 kHz | |
| | LFRJ: Blocks the DC component and attenuates the low-frequency components below 40 kHz | |
| | Noise suppression: The high frequency noise in the signal is suppressed to reduce the probability of oscilloscope being triggered by mistake | |

| | FlexRay trigger/decode option | | MS0/UP02000-Flex Ray |
| | Bode plot loop test analysis (software) | | MSO-BODE |
| | Isolation transformer | | UT-ISOT |
| | 16 digital channels option (software) | | UP02000-16LA |
| | High voltage probe | | UT-V23, UT-P21 |
| | High-Voltage Differential Probes | | UT-P30, UT-P31, UT-P32, UT-P33, UT-P35, UT-P36 |
| | Current Probe | | UT-P40, UT-P41, UT-P42, UT-P43, UT-P44 |
| | 16-way logic analyzer probe | | UT-M15 |

Note: All mainframes, accessories and options can be ordered from your local UNI-T dealer.

Passive probe

| Model | Туре | | Description |
|---------|------------------------------|-----------|--|
| UT-P01 | - High impedance probe | | 1X:DC to 8 MHz 10X:DC to 25 MHz Oscilloscope compatibility: UNI-T all series |
| UT-P03 | - High impedance probe | | 1X:DC to 8MHz 10X:DC to 60MHz Oscilloscope compatibility: UNI-T all series |
| UT-P04 | - High impedance probe | | 1X:DC to 8 MHz 10X:DC to 100 MHz Oscilloscope compatibility: UNI-T all series |
| UT-P05 | – High impedance probe | | 1X:DC to 8 MHz 10X:DC to 200 MHz Oscilloscope compatibility: UNI-T all series |
| UT-P06 | - High impedance probe | | 1X:DC to 8 MHz 10X:DC to 300 MHz Oscilloscope compatibility: UNI-T all series |
| UT-P07A | - High probe | impedance | 10X:DC to 500 MHz Input resistance: 10 MΩ Maximum safe operating voltage: <600 Vpk Oscilloscope compatibility: UNI-T all series |
| UT-P08A | High | impedance | 10X:DC to 350 MHz |

| | _ probe | Input resistance: 10 MΩ Maximum safe operating voltage: <600 Vpk Oscilloscope compatibility: UNI-T all series |
|--------|------------------------------|--|
| UT-P20 | – High impedance probe | DC to 100 MHz Probe coefficient 100:1 Maximum operating voltage 1500 Vrms Oscilloscope compatibility: UNI-T all series |
| UT-V23 | – High voltage probe | DC to 100 MHz Probe coefficient 100:1 Input resistance 100 MΩ±2% Maximum operating voltage 200 0Vpp Oscilloscope compatibility: UNI-T all series |
| UT-P21 | – High voltage probe | DC to 50 MHz Probe coefficient 1000:1 Maximum operating voltage DC 15 kVrms, AC 10 kV(sine wave) Oscilloscope compatibility: UNI-T all series |
| UT-P40 | Current probe | DC to 100 kHz Range 50mV/A, 5mV/A Current range 0.4A to 60A Maximum operating voltage 600Vrms Oscilloscope compatibility: UNI-T all series |
| UT-P41 | – Current probe | DC to 100 kHz Range 100 mV/A, 10 mV/A Current range 0.4 A to 100 A Maximum operating voltage 600 Vrms Oscilloscope compatibility: UNI-T all series |
| UT-P42 | – Current probe | DC to 150 kHz Range 100 mV/A, 10 mV/A Current range 0.4 A to 200 A Maximum operating voltage 600 Vrms Oscilloscope compatibility: UNI-T all series |
| UT-P43 | Current probe | DC to 25 MHz |

Range 100 mV/A Maximum measurement current 20 A

Rise time 14 ns

Oscilloscope compatibility: UNI-T all series

UT-P44

Current probe

DC to 50 MHz Range 50mV/A

Maximum measurement current 40A

Rise time 7ns

Oscilloscope compatibility: UNI-T all series

Active probe

Options ordering and installation

- 1. **Purchase options:** Based on your requirements, please purchase the specified function options from Uni-t Sales Personnel and provide the serial number of the instrument that needs the option installed.
- 2. **Receive certificate:** You will receive the license certificate based on the address provided in the order.
- 3. **Register and obtain license:** Visit the Uni-t official website license activation session for registration. Use the license key and instrument serial number provided in the certificate to obtain the option license code and license file.
- 4. **Install the option:** Download the option license file to the root directory of a USB storage device, and connect the USB storage device to the instrument. Once the USB storage device is recognized, the Option Install menu will be activated. Press this menu key to begin installing the option.

Datasheet MSO/UPO2000 Series

Limited Warranty and Liability

Uni-T guarantees that the Instrument product is free from any defect in material and workmanship within three years from the purchase date. This warranty does not apply to damages caused by accident, negligence, misuse, modification, contamination or improper handling. If you need warranty service within the warranty period, please contact your seller directly. Uni-T will not be responsible for any special, indirect, incidental or subsequent damage or loss caused by using this device. For the probes and accessories, the warranty period is one year. Visit instrument.uni-trend.com for full warranty information.

Learn more at: www.uni-trend.com

Register your product to confirm your ownership. You will also get product notifications, update alerts, exclusive offers and all the latest information you need to know.
