

- The measurement of speaker systems actual impedance at 1 kHz.
- Three test ranges (20 Ω / 200 Ω / 2000 Ω) allow testing of home theater and speaker system.
- LCD panoramic screen.
- It allows to estimate the necessary power in an installation for the suitable election of the amplifier.
- Data hold function.

AUDIO IMPEDANCE TESTER

Measurement range	20 Ω / 200 Ω / 2000 Ω
Test frequency	1 kHz
Accuracy	
Range 20 Ω	±2% rdg ± 2 dgt or ± 0.1 W, which is greater.
Range 200 W / 2000 Ω	±2% rdg ± 2 dgt
Presentation	
Display	LCD 3 ½ digit (2000 counts)
Power supply	
Batterie	9 V DC (6 batterie x 1.5V R6 type)
Mechanical features	
Dimensions	W. 90 x H. 205 x D. 55 (mm.)
Weight	Approx. 550 g (batteries included)
Included accessories	PP010 Test leads set with safety clamps User's manual Transport suitcase
