

- It carries out the earth resistance measurements by using the three-electrodes method.
- 2 mA measuring current permits earth resistance tests without tripping earth leakage current breakers in the circuit under test.
- It allows the measurement by using the simplified two-electrodes method.
- Data hold function.
- LCD panoramic screen.
- Timer for test function (count 3 5 minutes).
- Earth voltage measurement.
- Indicator of low battery on screen LCD.

0 ~ 199.9 V AC, 50 / 60 Hz.

Accuracy

Earth resistance:

 $\pm$  (2% rdg. + 2 dgt.) or  $\pm$  0.1  $\Omega,$  which is greater.

By means of a current injection of 820 Hz and 2 mA approx.
