Data Sheet

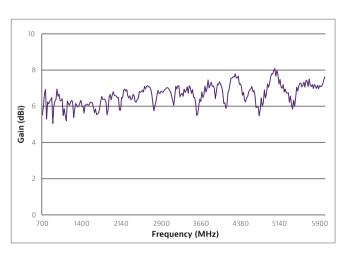

VIAVI Broadband **Log Periodic Antenna**

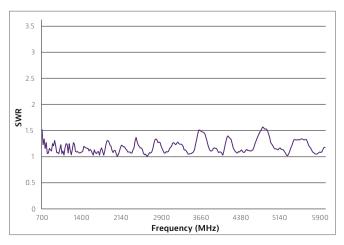

Quickly identify and isolate RF interference

The VIAVI Solutions® broadband log periodic antenna is an extremely cost-effective solution that works with an AntennaAdvisor handle and CellAdvisor/CellAdvisor 5G base station analyzers to let technicians at any skill level quickly identify and isolate RF interference. With a wide frequency coverage (up to 6 GHz), field technicians working in the cellular spectrum only need this one antenna for different cellular bands. A robust design and rugged construction with a high-tech radome housing protects against mechanical stress and environmental influence without sacrificing performance.
