RP-110

TEST SIGNAL GENERATOR FOR COAXIAL CABLE

✓ **Test signal generator to certificate coaxial cable in all the bands used for coaxial cable: CATV and SMATV**

✓ **Six pilots of frequency and level selectable by the user**

> P1: from 5.00 MHz to 10.00 MHz
> P2: from 55.00 MHz to 100.00 MHz
> P3: from 460.00 MHz to 540.00 MHz
> P4: from 800.00 MHz to 1000.00 MHz
> P5: from 1450.00 MHz to 1750.00 MHz
> P6: from 1850.00 MHz to 2150.00 MHz

✓ **Upstream bandwidth:** P1, P2

✓ **Downstream bandwidth (Downstream CATV and UHF):** P2, P3, P4

✓ **Satellite Downstream bandwidth (IF Sat):** P4, P5, P6

✓ Output level independent for each pilot and variable from 80 to 110 dBμV in 1 dB steps.
✓ Frequency resolution: 25 kHz.
✓ User interface in several languages.
✓ USB to PC connection for firmware updating and to configure frequencies and levels.

Attenuation test compatible with TV EXPLORER field meters

Automatic operation when using the ATTENUATION TEST included in **PROMAX TV EXPLORER** field meters.
