

# FLIR TA85

Solar Photovoltaic Test Leads  
for FLIR CM276 Clamp Meter

## Key Features:

- PV Test leads for CAT III to safely measure up to 1500 V with CM276 IGM Clamp Meter with Thermal Camera
- Safely measure DC power measurement on Solar Photovoltaic (PV) applications
- Test solar panel and inverter for troubleshooting and maintenance of PV systems
- The leads are two test tips (male) to 4 mm sheathed banana plug on 127 cm (5 in) test leads

## SPECIFICATIONS

<b>Product</b>	
Length	144 cm (56 in)
<b>Miscellaneous</b>	
What is in the box?	PV Test leads Quick Start Guide
Product Warranty	3-Year
Input impedance	10 M $\Omega$
<b>Certifications and Regulations</b>	
Product Certifications	cULus, CE, UKCA
Over-voltage category	CAT II 1500 V CAT III 1500 V CAT IV 1000 V
Safety standards	EN 61010-031
