

Trace Evidence Collection Vacuum

Trace Evidence Vacuum (#VACOS-F) comes standard with:

Part no. 31700C High Efficiency Main Filter

Part no. FFCT SIRCHIE® Factory Sealed One-Time Use Trace Evidence Collection Filter w/Crevice Tool and Evidence Collection Bag

Part no. OVPE004B 25' Detachable Power Cord

Part no. 31671 10' Stretch Hose

Part no. AVPA005 Hose Plug (2)

(All standard items are contained in the convenient tool box style vacuum.)

#FFCT

#FFUT

Optional:

Part no. FFUT SIRCHIE® Factory Sealed One-Time Use Trace Evidence Collection Filter w/Upholstery Tool and Evidence Collection Bag

The SIRCHIE® Trace Evidence Collection Filters (FFUT and FFCT) are designed and manufactured specifically for the collection of >90% of 3-10 micron particle evidence at crime scenes. The evidence filters offer one-time use to prevent any possibility of contamination

from one area to another. These filters are sealed at the factory, and these seals must not be disturbed either before or after the evidence is collected. The seal may be broken only by the laboratory technician.

CAUTIONS:

The trace evidence filter is intended for one use only. **DO NOT REUSE THIS FILTER** or either the CREVICE TOOL or UPHOLSTERY TOOL. Reuse will result in cross-contamination of evidence.

After the filter and applicable tool are sealed in an evidence collection bag, any attempt to open the sealed bag will result in easily detected distortion in the seal area.

SPECIFICATIONS:

120 Volt Motor: 5.4 Amps, 628 Watts, 99 CFM

Dimensions: Length: 19.25"

Width: 7.4"

Height: 9.3"

Weight: 11 LBS.

Certifications:

Warranty: 3 Year Limited
