

### Get a Good Grip on Your Voltage Connections with our New Jumbo Clip!

When making voltage connections you really need a to get a substantial hold onto lugs, bolts, conductors with an alligator clip that just won't let go. We know that sometimes wimpy clips just won't do! So we're introducing a new "Jumbo" alligator clip that has an excellent grasp of the situation.

These fully insulated extra-large alligator clips meet IEC61010 safety standards and come with a 4mm jack that connects to your PowerSight voltage leads. The serious-looking serrated jaw opens to 1.26" (32mm). Here's a picture:
