Connect Unit to WiFi network via Mobile device

Using a WiFi enabled device (smart phone, tablet, etc.), find **CC6500-XXXX**

5

in available networks.

XXXX will be last 4 digits of unit's S/N# (on back of unit).

Press Add/Confirm device restart

Click Add

Unit will reboot, connect to WiFi, and begin posting data.

Note: Upon successful connection, you will recieve an error message in your browser (Example: Safari cannot open the page because the network connection was lost.), and device reboot may take up to 1 minute, mobile will exit WiFi.

Note: The WiFi symbol will flash on device display until the device posts data successfully.

Note: ALLOW UP TO 30 MINS FOR DEVICE DATA TO UPDATE AND START TRANMITTING DATA.

If and ERR message occurs on device, press acknowledge button (\checkmark) and repeat steps 4-7.

Log-in to TraceableLIVE account to manage device settings, alarms, users, and payment options.

Open Web Browser on your mobile device

Enter into web browser: 192.168.1.1

Select desired local network to which the device will be connected, and enter password for network.

The most common network is WPA2.

Enter Device Information (located on back of unit)

Go to www.traceablelive.com Click on Add New Device
