Innovative Power Solutions

Understand your energy system to ensure optimum and economical operation

An efficient energy management system requires a perfect understanding of how the different elements within the electrical installation work together.

Whether this involves optimizing the lifetime of your equipment, avoiding power outages or tracking your energy consumptions, WEBVIEW accompanies you throughout the lifecycle of your energy management system.

SITE 888 A

Optimizing the lifetime of your equipment

The analysis of power quality helps you anticipate and defects that can cause premature ageing of your equipment.

Avoiding power outages

Continuous monitoring of the different parameters of your installation enables you to avoid the risks associated with disruptive tripping of protective devices.

Tracking energy consumptions

The continuous analysis of your energy performance is an essential tool to manage your long-term competitiveness.

Socomec, your best asset

European manufacturing group

- Socomec, a family owned manufacturer for over 90 years is an industrial group with a workforce of 3,200 employees around the world.

Experts in energy efficiency

- Creator of the DIRIS meter.
- Global solution provider: from measuring devices to energy management software, with the support of our professional services.
- Products particularly suited to industry, buildings and infrastructures.

Socomec Green Building.

Corpo. 088 A

WEBVIEW: a customizable and scalable energy management tool embedded in your communication gateways

WEBVIEW offers real-time monitoring of electrical installations and tracking of energy consumption levels, embedded in the DIRIS A power monitoring device and in the DIRIS Digiware D, DIRIS G and DATALOG H communication gateways.

It is intended for use by Facilities Managers who wish to have a complete tool to quickly analyze malfunctions within their electrical installation and to guarantee energy-related performance.

The benefits of the system

Performance

History of measurements from several hundred metering points and over many years.

Ergonomics

Easy to operate, with no specific training required.

Interoperability

Collects data from measurement equipments of multiple brands.

Customization

Display of data on an interactive user interface.

Various functions

Multiple functions available for managing your power supply.

Integration

Simplicity of commissioning via an automatic device discovery and data profile management.

WEBVIEW range

The functions

Analyze

- Analyse energy consumptions.
- Breakdown by location, usage and utility.
- Export of data in CSV format.

View

- Analysis of power quality events.
- Various graphical views.
- Detailed historical records of data.

Represent

- Customizable user interface.
- Real time values.
- Measurement plan.

Monitor

- Real-time measurement of electrical values.
- Graphical display, adapted to suit the analyzed data.
- Power quality analysis of the utility supply and of loads.

SOFT 073 A.FR

Connected to the Cloud

The range comprises IoT-ready connected products that facilitate the automatic export of data for remote processing, without any limit on time, distance and storage.

Expert Services

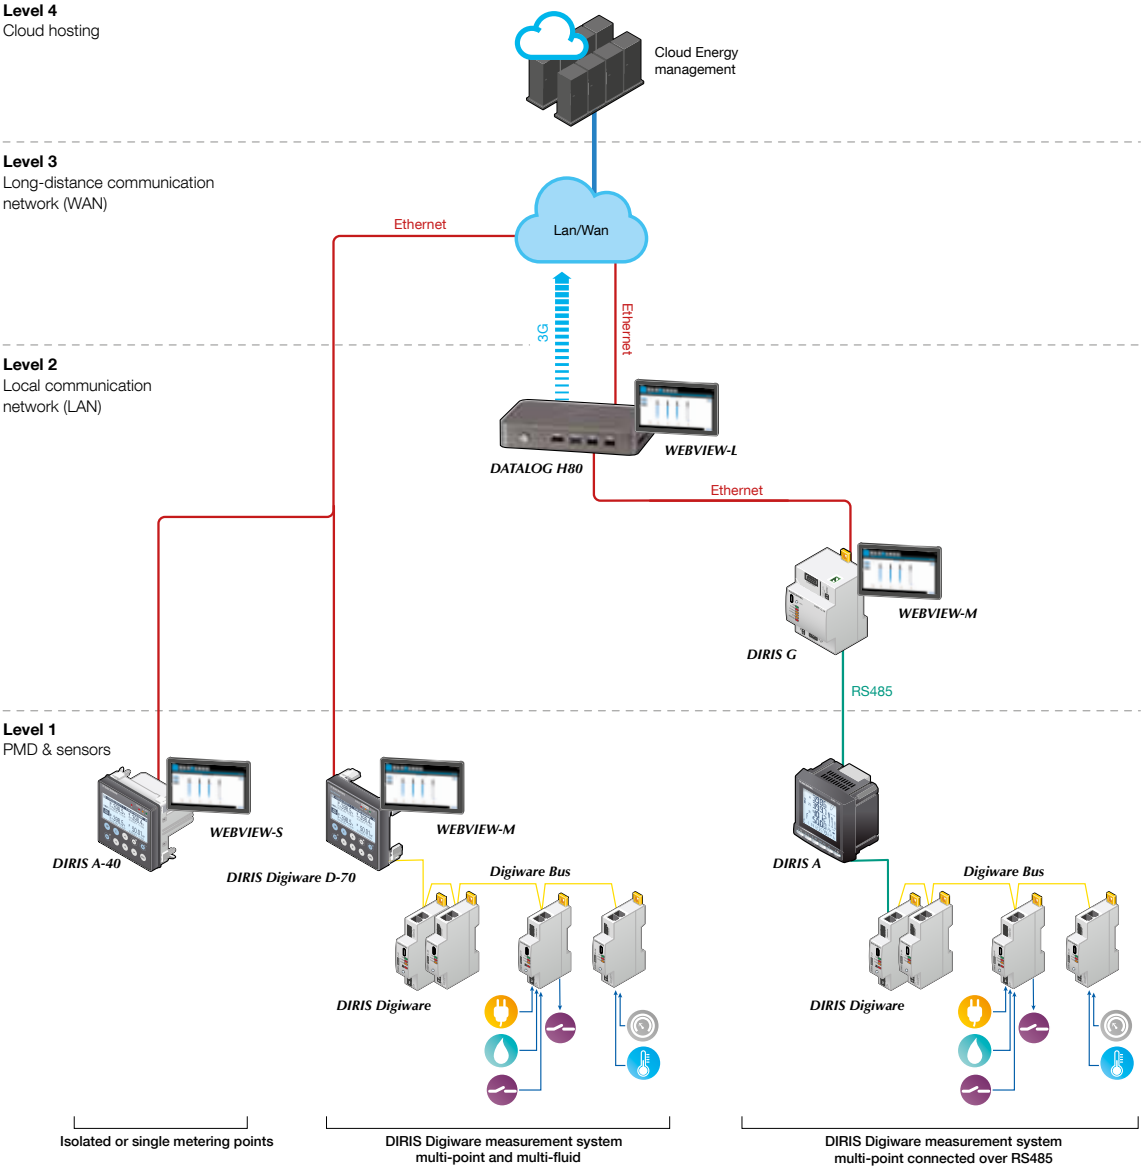

Require integration onto your network ?

No problem for our team. They work out all the details of the measurement schedule, the complete integration of all devices in your energy management system, the configuration of your software application, the training of your teams and details of operational support. For further information, please contact us.
